Re: Expedite Request

Dear Michael Schoenfeld,

On July 30, 2023, the Immigrant Investor Program Office (IIPO) received a request to expedite the processing of Form I-956F, INF2360001668, filed on January 24, 2023. After reviewing the expedite request and supplemental documentation, if applicable, U.S. Citizenship & Immigration Services (USCIS) has granted the expedite request. This approval for expedited processing applies only to the application cited above and not to any associated applications or petitions.

A decision on an expedite request is not an approval or a denial of the underlying benefit request. This expedite decision simply informs you whether USCIS will expedite processing by taking the application out of visa availability order. Once the application is assigned to an officer, the timeline for reaching an adjudicative decision will vary.

All expedite requests are reviewed on a case-by-case basis. The decision to grant or deny an expedite request is within the sole discretion of USCIS. Additional information on how to make an expedite request may be found on the USCIS website at <https://www.uscis.gov/forms/how-make-expedite-request>.

Sincerely,

Alissa Emmel  
Chief, Immigrant Investor Program Office
